December 2023

Volume: 11

Issue: 3

Turkish Journal of Immunology is the official scientific and periodical publication of the Turkish Immunology Association.

It is published quarterly as 3 issues per year (April, August, December).  
TJI is an open access, free and peer-reviewed journal, and language is English

This journal has been indexed in e-SCI, SCOPUS, TÜBİTAK ULAKBİM TR Dizin, Türk Atrf Dizini (Turkish Citation Index) since September of 2011 and EBSCO since September of 2020.

## ABOUT

---

Turkish Journal of Immunology is the official and periodical journal of the Turkish Society of Immunology. It is published three times a year in April, August and December. All articles published in the journal have been available online [www.turkishimmunology.org](http://www.turkishimmunology.org)

### Permission Request

Manuscripts, pictures, figures, graphics and tables published in the Turkish Journal of Immunology can not be reproduced, archived in a system, used in advertisement materials, without permission or without the written permission of the Turkish Society of Immunology. Citations can be included in scientific articles with referral.

### Scientific and Legal Responsibility of the Articles

Scientific and legal responsibility of the published articles belongs to the authors. Authors are responsible for the contents of the articles and accuracy of the references. Turkish Society of Immunology, the Editor, the Associated Editors or the publisher do not accept any responsibility for the published articles.

### Open Access

This work is licensed under the Creative Commons Attribution-NonCommercial-Non-Derivatives 4.0 International License (CC BY-NC-ND 4.0).

Turkish Journal of Immunology is an open access journal complying with the definition of BOAI (Budapest Open Access Institute). By "open access" to this literature, BOAI mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

### Database Information

Turkish Journal of Immunology has been indexed in e-SCI, SCOPUS, TÜBİTAK ULAKBİM TR Dizin, Türk Atıf Dizini (Turkish Citation Index) since September of 2011, EBSCO, Gale and Embase.

## INSTRUCTIONS TO AUTHORS

---

Turkish Journal of Immunology (e-ISSN 2147-8325), accepts original articles, short communications, invited reviews and editorial papers on condition that they have not been published elsewhere previously but in abstract form. The journal accepts manuscripts both in Turkish and English to be published online.

Turkish Journal of Immunology does not charge any article submission or processing charges.

A manuscript will be considered only with the understanding that it is an original contribution that has not been published elsewhere.

Editors prepare all articles directly or indirectly related to immunology for publication. Reviewed and accepted manuscripts are translated either from Turkish to English or from English to Turkish by the journal through a professional translation service. Prior to publishing, the translations are submitted to the authors for approval or correction requests, to be returned within 7 days. If no response is received from the corresponding author within this period, the translation is checked and approved by the editorial board.

In addition, the editors encourage the submission of book reviews, meeting reports and correspondence related to the field of immunology. Turkish Journal of Immunology is the official and periodical publication of the Turkish Society of Immunology with scientific content; it is published three times a year (April, August and December).

The official abbreviation of the Turkish Journal of Immunology is TJI; however, it should be denoted as Turk J Immunol when referenced. In the international indexes and databases, the name of the journal has been registered as Turkish Journal of Immunology and abbreviated as Turk J Immunol.

The scientific and ethical liability of the manuscripts belongs to the authors and the copyright of the manuscripts belongs to the Turkish Journal of Immunology. Authors are responsible for the contents of the manuscript and the accuracy of the references. All manuscripts submitted for publication must be accompanied by the Copyright Transfer Form. Once this form, signed by all the authors, has been submitted, it is understood that neither the manuscript nor the data it contains have been submitted elsewhere or previously published, and authors declare the statement of scientific contributions and responsibilities of all authors. All manuscripts submitted to the Turkish Journal of Immunology are screened for plagiarism using the 'iThenticate' software. Results indicating plagiarism may result in manuscripts being returned or rejected.

Experimental, clinical and drug studies requiring approval by an ethics committee must be submitted to the Turkish Journal of Immunology with an ethics committee approval report confirming that the study was conducted in accordance with international agreements and the Declaration of Helsinki (revised 2013) (<https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/>). The approval of the ethics committee and the fact that informed consent was given by the patients should be indicated in the Materials and Methods section. In experimental animal studies, the authors should indicate that the procedures followed were in accordance with animal rights as per the Guide for the Care and Use of Laboratory Animals (<http://oacu.od.nih.gov/regs/guide/guide.pdf>) and they should obtain animal ethics committee approval. If the article includes any direct or indirect commercial links or if any institution provided material support to the study, authors must state in the cover letter that they have no relationship with the commercial product, drug, pharmaceutical company, etc. concerned; or specify the type of relationship (consultant, other agreements), if any.

Authors must provide a statement on the absence of conflicts of interest among the authors and provide authorship contributions.

The Turkish Journal of Immunology is an independent international journal based on single-blind peer-review principles. Reviewers are selected among independent experts who have publications and citations in the international literature on the subject of the article.

The manuscript is assigned to the Editor-in-Chief, who reviews the manuscript and makes an initial decision based on manuscript quality and editorial priorities. Manuscripts that pass initial evaluation are sent for external peer review, and the Editor-in-Chief assigns an Associate Editor. The Associate Editor sends the manuscript to three reviewers (internal and/or external reviewers). The reviewers must review the manuscript within 21 days.

The Associate Editor recommends a decision based on the reviewers' recommendations and returns the manuscript to the Editor-in-Chief. The Editor-in-Chief makes a final decision based on editorial priorities, manuscript quality, and reviewer recommendations. If there are any conflicting recommendations from reviewers, the Editor-in-Chief can assign a new reviewer.

The scientific board guiding the selection of the papers to be published in the journal consists of elected experts of the Journal and, if necessary, selected from national and international authorities. The Editor-in-Chief, Associate Editors, biostatistics expert and English language consultant may make minor corrections to accepted manuscripts that do not change the main text of the paper.

In case of any suspicion or claim regarding scientific shortcomings or ethical infringement, the Journal reserves the right to submit the manuscript to the supporting institutions or other authorities for investigation. The Journal accepts the responsibility of initiating action but does not undertake any responsibility for an actual investigation or any power of decision.

## Instructions to Authors

The Editorial Policies and General Guidelines for manuscript preparation specified below are based on "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE Recommendations)" by the International Committee of Medical Journal Editors (2013, archived at <http://www.icmje.org/>).

Preparation of research articles, systematic reviews and meta-analyses must comply with study design guidelines:

CONSORT statement for randomized controlled trials (Moher D, Schultz KF, Altman D, for the CONSORT Group. The CONSORT statement revised recommendations for improving the quality of reports of parallel group randomized trials. *JAMA* 2001; 285: 1987-91) (<http://www.consort-statement.org/>);

PRISMA statement of preferred reporting items for systematic reviews and meta-analyses (Moher D, Liberati A, Tetzlaff J, Altman DG, The PRISMA Group. Preferred Reporting Items for Systematic Reviews and Meta-Analyses: The PRISMA Statement. *PLoS Med* 2009; 6(7): e1000097.) (<http://www.prisma-statement.org/>);

STARD checklist for the reporting of studies of diagnostic accuracy (Bossuyt PM, Reitsma JB, Bruns DE, Gatsonis CA, Glasziou PP, Irwig LM, et al., for the STARD Group. Towards complete and accurate reporting of studies of diagnostic accuracy: the STARD initiative. *Ann Intern Med* 2003;138:40-4.) (<http://www.stard-statement.org/>);

STROBE statement, a checklist of items that should be included in reports of observational studies (<http://www.strobe-statement.org/>);

MOOSE guidelines for meta-analysis and systemic reviews of observational studies (Stroup DF, Berlin JA, Morton SC, et al. Meta-analysis of observational studies in epidemiology: a proposal for reporting Meta-analysis of observational Studies in Epidemiology (MOOSE) group. *JAMA* 2000; 283: 2008-12).

### SUBMISSION OF MANUSCRIPTS

All manuscripts must be submitted via the online submission system after logging on to the website [www.turkimmunoloji.dergisi.org](http://www.turkimmunoloji.dergisi.org). Authors who have any queries can contact the following addresses:

#### Editor in Chief

**Prof. Dr. Günnur Deniz**

**Address:** İstanbul University, DETAE, Department of Immunology, Vakıf Gureba St., 34393 Şehremini, İstanbul, Turkey

**E-mail:** [gdeniz@istanbul.edu.tr](mailto:gdeniz@istanbul.edu.tr) **Phone:** 0212 - 414 20 97 **Fax:** 0212 - 532 41 71

#### Managing Editor

**Prof. Dr. Akif Turna**

**Address:** İstanbul University-Cerrahpaşa, Cerrahpaşa Faculty of Medicine, Department of Chest Disease, İstanbul, Turkey

### GENERAL GUIDELINES

Manuscripts can only be submitted electronically through the Journal Agent website (<http://jag.journalagent.com/tji/>) after creating an account and a password. This system allows online submission and review.

The manuscripts are archived according to ICMJE, Index Medicus (Medline/PubMed) and Ulakbim-Turkish Medicine Index Rules.

**Format:** Manuscripts should be prepared using Microsoft Word, size A4 with 2.5 cm margins on all sides, 12 pt Arial font and 1.5 line spacing.

**Abbreviations:** Abbreviations should be defined at first mention and used consistently thereafter. Internationally accepted abbreviations should be used; refer to scientific writing guides as necessary.

**Cover letter:** The cover letter should include statements about the manuscript type, single-journal submission affirmation, conflict of interest statement, sources of outside funding, equipment (if applicable), approval of language for articles in English and approval of statistical analysis for original research articles.

### REFERENCES

Authors are solely responsible for the accuracy of all references.

**In-text citations:** References should be indicated in parentheses immediately before the period/full stop of the relevant sentence. If the author(s) of a reference is/are indicated at the beginning of the sentence, this reference should be written in parentheses immediately after the author's name. If relevant research has been conducted in Turkey or by Turkish investigators, these studies should be given priority while citing the literature.

Presentations presented in congresses, unpublished manuscripts, theses, Internet addresses, and personal interviews or experiences should not be indicated as references. If such references are used, they should be

# Instructions to Authors

## GENERAL GUIDELINES

Manuscripts can only be submitted electronically through the Journal Agent website (<http://jag.journalagent.com/tji/>) after creating an account and a password. This system allows online submission and review

The manuscripts are archived according to ICMJE, Index Medicus (Medline/PubMed) and Ulakbim-Turkish Medicine Index Rules.

Format: Manuscripts should be prepared using Microsoft Word, size A4 with 2.5 cm margins on all sides, 12 pt Arial font and 1.5 line spacing.

Abbreviations: Abbreviations should be defined at first mention and used consistently thereafter. Internationally accepted abbreviations should be used; refer to scientific writing guides as necessary.

Cover letter: The cover letter should include statements about manuscript type, single-journal submission affirmation, conflict of interest statement, sources of outside funding, equipment (if applicable), approval of language for articles in English and approval of statistical analysis for original research articles.

## REFERENCES

Authors are solely responsible for the accuracy of all references.

In-text citations: References should be indicated in parentheses immediately before the period/full stop of the relevant sentence. If the author(s) of a reference is/are indicated at the beginning of the sentence, this reference should be written in parentheses immediately after the author's name. If relevant research has been conducted in Turkey or by Turkish investigators, these studies should be given priority while citing the literature.

Presentations presented in congresses, unpublished manuscripts, theses, Internet addresses, and personal interviews or experiences should not be indicated as references. If such references are used, they should be indicated in parentheses at the end of the relevant sentence in the text, without reference number and written in full, in order to clarify their nature.

References section: References should be numbered consecutively in the order in which they are first mentioned in the text. All authors should be listed regardless of number. The titles of journals should be abbreviated according to the style used in the Index Medicus. References should be written according to the examples below and all authors should be presented in references up to 6 authors, reference tags with more authors than 6 should be abbreviated with et al.

### Reference Format

Journal: Last name(s) of the author(s) and initials, article title, publication title and its original abbreviation, publication date, volume, the inclusive page numbers. Example: Collin JR, Rathbun JE. Involutions of entropy: a review with evaluation of a procedure. *Arch Ophthalmol.* 1978;96:1058-64.

Book: Last name(s) of the author(s) and initials, chapter title, book editors, book title, edition, place of publication, date of publication and inclusive page numbers of the extract cited.

Example: Herbert L. *The Infectious Diseases* (1st ed). Philadelphia; Mosby Harcourt; 1999:11;1-8.

Book Chapter: Last name(s) of the author(s) and initials, chapter title, book editors, book title, edition, place of publication, date of publication and inclusive page numbers of the cited piece.

Example: O'Brien TP, Green WR. Periocular Infections. In: Feigin RD, Cherry JD, eds. *Textbook of Pediatric Infectious Diseases* (4th ed). Philadelphia; W.B. Saunders Company; 1998:1273-78.

Books in which the editor and author are the same person: Last name(s) of the author(s) and initials, chapter title, book editors, book title, edition, place of publication, date of publication and inclusive page numbers of the cited piece.

Example: Solcia E, Capella C, Kloppel G. Tumors of the exocrine pancreas. In: Solcia E, Capella C, Kloppel G, eds. *Tumors of the Pancreas*. 2nd ed. Washington: Armed Forces Institute of Pathology; 1997:145-210.

## TABLES, GRAPHICS, FIGURES, AND IMAGES

All visual materials together with their legends should be located on separate pages that follow the main text. Explanations of figures, pictures, tables and figures should be added at the end of the article.

### Images:

Images (pictures) should be numbered and include a brief title. Permission to reproduce pictures that were published elsewhere must be included. All pictures should be of the highest quality possible, in JPEG format, and at a minimum resolution of 300 dpi.

### Tables, Graphics, Figures:

All tables, graphics or figures should be enumerated according to their sequence within the text and a brief descriptive caption should be written. Any abbreviations used should be defined in the accompanying legend.

## Instructions to Authors

---

Tables in particular should be explanatory and facilitate readers' understanding of the manuscript, and should not repeat data presented in the main text.

### BIostatISTICS

To ensure controllability of the research findings, the study design, study sample, and the methodological approaches and applications should be explained and their sources should be presented.

The "p" value defined as the limit of significance along with appropriate indicators of measurement error and uncertainty (confidence interval, etc.) should be specified. Statistical terms, abbreviations and symbols used in the article should be described and the software used should be defined. Statistical terminology (random, significant, correlation, etc.) should not be used in non-statistical contexts.

All results of data and analysis should be presented in the "Results" section as tables, figures and graphics; biostatistical methods used and application details should be presented in the "Materials and Methods" section or under a separate title.

### MANUSCRIPT TYPES

#### Original Articles

Clinical research should comprise clinical observation, new techniques or laboratories studies. Original research articles should include title, structured abstract, key words relevant to the content of the article, introduction, materials and methods, results, discussion, study limitations, conclusion references, tables/figures/images and acknowledgement sections. Title, abstract and key words should be written in English. The manuscript should be formatted in accordance with the above-mentioned guidelines and should not exceed sixteen A4 pages.

Title Page: This page should include the title of the manuscript, short title, name(s) of the authors and author information. The following descriptions should be stated in the given order:

Title of the manuscript (English), as concise and explanatory as possible, including no abbreviations, up to 135 characters

Short title (English), up to 60 characters

Name(s) and surname(s) of the author(s) (without abbreviations and academic titles) and affiliations

Name, address, e-mail, phone and fax number of the corresponding author

The place and date of scientific meeting in which the manuscript was presented and its abstract published in the abstract book, if applicable

Abstract: The abstract of the manuscript should be written in English and consist of maximum 250 words. References should not be cited in the abstract. Use of abbreviations should be avoided as much as possible; if any abbreviations are used, they must be taken into consideration independently of the abbreviations used in the text.

For original articles, the structured abstract should include the following sub-headings:

Objectives: The aim of the study should be clearly stated.

## Publication Policies

Utilized Resources  
Budapest Open Access Initiative  
Creative Commons  
COPE (Committee on Publication Ethics)  
DOAJ Principles Of Transparency And Best Practice In Scholarly Publishing, Version 3  
Education and Science Journal Publication Policies  
ICMJE (International Committee Of Medical Journal Editors)  
COHE Scientific Research and Publication Ethics Directive

### EDITORIAL POLICIES

All manuscripts will be evaluated by the scientific board for their scientific contribution, originality and content. Authors are responsible for the accuracy of the data. The journal retains the right to make appropriate changes on the grammar and language of the manuscript. When suitable the manuscript will be sent to the corresponding author for revision. The manuscript, when published, will become the property of the journal and copyright will be taken out in the name of the journal. Articles previously published in any language will not be considered for publication in the journal. Authors cannot submit the manuscript for publication in another journal. All changes in the manuscript will be made after obtaining written permission of the author and the publisher. Full text of all articles can be downloaded at the website of the journal [www.turkishimmunology.org](http://www.turkishimmunology.org)

### OPEN ACCESS POLICY

We support the open access initiative declared in Budapest Open Access Initiative which states that the peer-reviewed journal literature should be open access, and offers all the published articles free of charge in an environment where everyone can read and download. The term "open access" in this declaration means that" by means of internet, scientific literature can be accessed, read, recorded, copied, printed, scanned, linked to full text, indexed, transferred as data to the software, and used for all legal purposes without the financial, legal and technical barriers

Considering the role of information sharing in the advancement of science, open access is of great importance for researchers and readers. For this reason, the articles published in this journal may be used as long as the author and the original source are cited. No permission is required from authors or publishers. The articles in Turkish Journal of Immunology are accessible through search engines, websites, blogs and other digital platforms.

These open access policies accepted on September 12, 2012, and also adopted by our editorial board are also accessible at <http://www.budapestopenaccessinitiative.org/boai-10-translations/turkish-translation>.

Turkish Journal of Immunology does not demand any subscription fee, publication fee or similar payment for the access into electronic resources.

### Creative Commons

By citing the author and the journal at the same time, without any profit-making motive, and only for educational purposes, the readers can copy the article without the permission of the copyright holder.

Turkish Journal of Immunology is an open access publication, and the journal's publication model is based on Budapest Open Access Initiative (BOAI) declaration. (<https://www.budapestopenaccessinitiative.org/read/> ) All published content is available online, free of charge at <https://www.turkishjcrd.com/>. The journal's content is licensed under a Attribution-NonCommercial-NoDerivatives 4.0 International (CC BY-NC-ND 4.0) (Attribution-NonCommercial-NoDerivatives 4.0 International (CC BY-NC-ND 4.0) which permits third parties to share the content for non-commercial purposes by giving the appropriate credit to the original work.

### HUMAN AND ANIMAL STUDIES

Manuscripts submitted for publication must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1975 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of Laboratory Animal Care" (NIH publication No. 86-23, revised 1985) were followed, as well as specific national laws where applicable. The editors reserve the right to reject manuscripts that do not comply with the above mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above mentioned requirements.

In a cover letter the authors should state if any of the material in the manuscript is submitted or planned for publication elsewhere in any form including electronic media. The cover letter must contain address, telephone, fax and the e-mail address of the corresponding author.

## Publication Policies

---

### **ETHICAL POLICY**

It is targeted that all parties participating in the creation of a scientific study (author, editor, reviewer, publisher and reader) contribute to the proper progress of science. Compliance with scientific ethical principles is important in the scientific studies prepared in accordance with this target. We adopted the ethical principles based on the directive prepared by the Committee on Publication Ethics (COPE) and recommended its adoption by all individuals contributing in the creation of a scientific work. Some items of this directive are mentioned below.

#### **Ethical Responsibilities of the Authors**

To ensure that the data related to the study is correct, to keep the records of the study regularly and to provide access to these data upon a possible request.

To ensure that the article he/she submitted is not published or accepted elsewhere.

If the content submitted by the author matches the already published or presented content, to accept and quote this conflict and, when necessary, to provide the editor with a copy of any work that may have similar content related to his / her work, to obtain permission to reproduce, and use any content from other sources, and cite it as a reference.

To ensure that all studies involving human or animal subjects comply with national and international laws and guidelines (eg WMA Helsinki Declaration, NIH Policy on the Use of Laboratory Animals, EU Directive on the Use of Animals) to approve that necessary approvals have been obtained, to respect subject privacy, to indicate the relevant ethics committee approvals and research details in "Materials and Methods" section of the study.

In case of any conflict of interest, when he / she finds an ethical violation related to his / her article, he / she will share it with the editor and publisher, and publish a statement of error, addendum, indemnity notice or withdraw the work if deemed it necessary.

#### **Ethical Duties and Responsibilities of the Editors**

Acting in a balanced, objective and fair manner while performing their duties without any discrimination based on gender, religious or political beliefs, ethnic or geographical origin of the authors.

To evaluate the work submitted to the journal according to its content without showing any privilege to any author.

To take necessary measures to prevent potential conflicts of interest and to evaluate existing statements, if any.

To deal with sponsored works or special studies in the same way as other studies,

In case of complaints related to violation of ethics, to enforce necessary procedures by adhering to the policies and procedures of the journal. To give the authors an opportunity to respond to the complaint, and without refraining from imposing the necessary sanctions, regardless of the identity of the owner of the work

To reject the study if it does not meet the purpose and scope of the journal.

#### **Ethical Responsibilities of the Reviewers**

In order to contribute to the editor's decision-making process, the manuscript should be scrutinized in a timely fashion and reviews should only accept the critical evaluation of the study of his/her expertise.

The assessment should be done in an objective manner only in relation to the content of the study. The study should be evaluated without considering religious, political and economic interests.

To make suggestions to help improve the quality of the article to be published and to critically review the study. To communicate his/her comments to the author in a constructive and gentle language.

To protect the confidentiality of the information provided by the editor and the author, to destroy the work after the evaluation process in accordance with the principle of confidentiality, to report to the editor if there is anything contrary to the blind review process and not to evaluate this study.

To be cognizant of potential conflicts of interest (financial, institutional, collaborative, or other relationships between the author and the author), and, if necessary, to alert the editor to withdraw his or her assistance for this article.

#### **Ethical Responsibilities of the Publisher**

Among the parties involved in a creation of a scientific study, the publisher should act within all these ethical principles.

In addition to these, the publisher is obliged to use its communication power without any individual interest and to direct the target audience correctly.

It protects the ownership and copyright of each work published in its journals/books and undertakes the task of archiving every published work.

## Publication Policies

---

People should not hesitate to get contact with the publisher when they encounter an unethical situation.

Some of the actions considered to be against scientific research and publication ethics

**Plagiarism:** To adopt the original ideas, methods, data or works of others partially or wholly without referencing them in compliance with scientific rules,

**Fraud:** to use data that is not actually present or falsified in scientific research

**Distortion:** Distorting the research records or data obtained, demonstrating unused devices or materials as if they were used in the research, and distorting or shaping the results of research in the interests of the people and organizations that sponsored the study;

**Republication:** To present duplicates as separate publications in academic appointments and elevations

**Slicing:** To present the results of a research as separate publications in academic appointments and upgrades by disseminating and publishing the results of a research in a way that disrupts the integrity of the research and submit them as separate publications more than once;

**Unfair authorship:** to include people who are not active contributors or not to include those who are contributing to the study, to change the ranking of the authors inappropriately without any justification and, to remove the names of those who offered their active contributions in the previous editions, to include their names among the writers by using their influence even though they did not actively contributed to the work

**Not specifying the people, institutions or organizations that support the publications realized as a result of the researches carried out with their support, and contributions,**

**To use the thesis or studies which have not been submitted yet or have not been accepted as a source without the permission of the owner,**

**Failure to comply with ethical rules in human and animal researches, not to respect patient rights in its publications, to harm animal health and ecological balance, to refrain from obtaining necessary permissions,**

**To misuse resources, places, facilities and devices provided for scientific research,**

**To make false or misleading statements regarding scientific research and publications in academic appointments and elevations.**

### **PLAGIARISM POLICY**

Plagiarism (cheating) is a violation of ethics, regardless of whether it is intentional or not. It is a crime and an unacceptable code of conduct as it is unethical to submit, and publish manuscripts imitating other sources, without citing references,. For this reason due to publication policies for all studies to be published in all of its periodicals, we necessitate the use of a plagiarism checker.

All studies submitted to our periodicals and passed the evaluation of the reviewers blinded to the studies, are evaluated by us using Turnitin or iThenticate software programs.

In our study, our criterion is not a percentage of matching. An auditing is carried out by a specialized team excluding percentages of matching but considering the parameters, such as identification of matching paragraphs, whether or not citations and references are properly written in accordance with the writing rules of the journal, the places of the matching sentences/paragraphs in the article, and the sources with which they are matched. The prepared plagiarism report is sent to the relevant editor of the study. In consideration of the report, the editorial board may request from the author correction of the errors in the manuscript and sent it again or accept or reject it. The acceptance of the study is on the initiative of the editor

The Editorial Board may act in accordance with the COPE rules against allegations, and suspicions related to plagiarism, citation manipulation and fraudulent misrepresentation of the works submitted to the journal.

### **COPYRIGHT TRANSFER**

Works submitted to our journals to be published should be original works that have not been previously published in any way or sent to any journal for publication. When submitting their works, individuals are obliged to declare that the study, in whole or in part, has not been previously published on any other platform or evaluated for publication. Otherwise, the author will be held responsible for the related sanctions.

The authors should agree to waive the copyright of their work and transfer this right together with its submission to the Turkish Society of Immunology for evaluation. This transfer becomes the tying clause upon the acceptance of the publication. No part of the printed material may be used in any other place without the written permission of the publisher.

Publication processes of the Journal is carried out in accordance with the guidelines of International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Scientific Council of Editorial (CSE), Committee of Publication Ethics (COPE), European Association of Science Editors (EASE) and National Information Standards Organization (NISO).

## Publication Policies

---

Authors' rights to use all unregistered rights other than patents, and copyrights for their own purposes provided that they do not sell the work, and all or a part of their works provided that they indicate identity of books and other academic studies in their websites or open files of a university are reserved.

Authors should obtain permission from the copyright holder when using previously published contents, including pictures, tables, or like in printed or electronic format. The legal, financial and criminal responsibility in this regard belongs to the authors.

Authors who have sent a study to our journal should complete the "Copyright Transfer Form" document upon acceptance before publication process starts. The author(s) must sign the completed form with a wet signature. The signed form must be scanned and loaded with additional file upload option in successive steps of submission process.

### **CONFLICT OF INTEREST**

Conditions which provide financial or personal benefit bring about a conflict of interest. The reliability of the scientific process and the published articles is directly related to the objective consideration of conflicts of interest during the planning, implementation, writing, evaluation, editing and publication of scientific studies.

Financial relations are the most easily identified conflicts of interest and it is inevitable that they will undermine the credibility of the journal, the authors and the science. These conflicts can be caused by individual relations, academic competition or intellectual approaches. The authors should refrain as much as possible from making agreements with sponsors in the opinion of gaining profit or any other advantage that restrict their ability to access to all data of the study or analyze, interpret, prepare, and publish their articles. In order to prevent conflicts of interest, editors should refrain from bringing together those who may have any relationship between them during the evaluation of the studies. The editors, who make the final decision about the articles, should not have any personal, professional or financial ties with any of the issues they are going to decide. Authors should inform the editorial board concerning potential conflicts of interest to ensure that their articles will be evaluated within the framework of ethical principles through an independent assessment process.

Our publication team works devotedly to ensure that the evaluation process is conducted in an impartial manner, taking all these situations into consideration.

You can review the conflict of interest form and the related link to get more detailed information and to declare an conflict of interest.
