

2025 Subject-Index

Acute lymphoblastic leukemia	54	Leaky severe combined immunodeficiency	146
Antigen presentation	132	Linkage disequilibrium	177
Antinuclear antibodies	90	Lupus nephritis	43
Apoptosis	2	Major histocompatibility complex	132
Artemis	146	Maternal supplementation	158
Biomarker	54	Mice of different genetic backgrounds	22
Cancer	54	Microbiota	62
CD4 T cell proliferation	169	Microorganisms	62
CD73	80	Molecular dynamics	132
Cell death	2	Necroptosis	2
Cellular immunodeficiency	109	Neutrophil	33
Children	54	Next-generation sequencing	177
Circular RNA	122	Oil emulsion adjuvant	99
Combined immune deficiency	146	PANoptosis	2
Common variable immune deficiency	70	Population genetics	177
CVID	70	Programmed cell death 1	122
<i>DCLRE1C</i>	146	Protein dynamics	132
De-novo acute myeloid leukemia	80	Protein energy networks	132
Diagnosis	54	Protein stability	132
Dihydrorhodamine 123	33	Pyroptosis	2
Enteropathy in CVID	70	rs11264799	43
Environmental balance	62	rs7528684	43
Evolution	62	<i>sHLA-G</i>	54
Extractable antinuclear antibodies	90	SLE	43
<i>FCRL3</i>	43	Structural bioinformatics	132
Flow cytometry	33	Symbiosis	62
Foot and mouth disease	99	Systemic autoimmune rheumatic diseases	90
Gastrointestinal tract inflammation in CVID	70	Th1 and Th2 cytokines	169
H1N1-PR8 influenza A virus	22	Thymic hypoplasia	109
<i>Haemophilus influenzae</i>	169	Treatment outcome	80
Hardy-Weinberg equilibrium	177	Typing resolution	177
HLA	177	Vaccine	99
IFN- γ levels	22	Validation study	33
IgM/IgG	22	Vitamin D ₃	158
IL-1 β and IL-6	158		
Immune checkpoints	122		
Immune response	99		
Immune system	62		
Immunogenicity	132		
Infections	109		
Inflammation	158
